Fiscal Detail and Notes

This bill creates the Offshore Wind Research Consortium Fund within the Governor's Energy Office (GEO) and directs the office to coordinate the development and execution of a research strategy to better understand the impacts of floating offshore wind power projects in the Gulf of Maine. The bill includes an ongoing \$500 allocation beginning in fiscal 2021-22 to establish the fund and allow expenditures of any money received. The GEO has indicated that it anticipates having sufficient resources to carry out the activities required by the bill.

Any additional costs to the Department of Agriculture, Conservation and Forestry, the Public Utilities Commission and the Department of Environmental Protection as a result of a review of their existing programs to prepare recommendations for any statutory changes to these programs necessary to implement the moratorium established by the bill are anticipated to be minor and can be absorbed within existing budgeted resources.
