SUMMARY

This amendment is the majority report and makes the following changes to the bill.

1. It creates in the Maine Criminal Code affirmative defenses to prosecution for
aggravated attempted murder, for murder and for aiding or soliciting suicide. A person
may raise an affirmative defense to prosecution for these crimes if that person's conduct
was expressly authorized by the Maine Revised Statutes, Title 22, chapter 418. The
amendment also strikes from the bill language that creates new Class A crimes and other
penalty language, as the prohibited conduct described is sufficiently covered by existing
statute.

2. It changes the rule-making authority of the Department of Health and Human
Services for rules for the collection of information from routine technical to major
substantive.

3. It makes technical changes to the provisions regarding insurance in order to
conform to current Maine law.
4. It allows the physician completing the patient's death certificate to determine the cause of the death recorded on the certificate.

5. It clarifies that an individual health care provider may choose not to participate in providing medication to end a qualified patient's life but, if the patient requests the medical records be provided to another health care provider, the records must be transferred.

6. It includes the Board of Osteopathic Licensure in the list of appropriate licensing boards.
