17 **2. Parity for telehealth services.** A carrier offering a health plan in this State may
18 not deny coverage on the basis that the health care service is provided through telehealth if
19 the health care service would be covered if it were provided through in-person consultation
20 between an enrollee and a provider. Coverage for health care services provided through
21 telehealth must be determined in a manner consistent with coverage for health care services
22 provided through in-person consultation. A carrier shall reimburse a provider for the
23 diagnosis, consultation with or treatment of an enrollee delivered through telehealth
24 services on the same basis and at least at the rate of reimbursement at which the carrier
25 reimburses a provider for the provision of the same, or substantially similar, service through
26 in-person consultation. If an enrollee is eligible for coverage and the delivery of the health
27 care service through telehealth is medically appropriate, a carrier may not deny coverage
28 for telehealth services. A carrier may not offer a health plan under which any deductible
29 applied to health care services delivered through telehealth accumulates separately from
30 the deductible that applies in the aggregate to all services covered under the health plan. A
31 carrier may offer a health plan containing a provision for a ~~deductible~~, copayment or
32 coinsurance requirement for a health care service provided through telehealth as long as
33 the ~~deductible~~, copayment or coinsurance does not exceed the ~~deductible~~, copayment or
34 coinsurance applicable to a comparable service provided through in-person consultation.
35 A carrier may not exclude a health care service from coverage solely because such health
36 care service is provided only through a telehealth encounter, as long as telehealth is
37 appropriate for the provision of such health care service.

38 **Sec. 9. 24-A MRSA §4316, sub-§5**, as enacted by PL 2019, c. 289, §2, is repealed.

39 **Sec. 10. Application.** The requirements of this Act apply to health plans, as defined
40 in the Maine Revised Statutes, Title 24-A, section 4301-A, subsection 7, executed,
41 delivered, issued for delivery, continued or renewed in this State on or after January 1,
42 2022. For the purposes of this Act, all health plan contracts are deemed to be renewed no
43 later than the next yearly anniversary of the contract date.

SUMMARY

This bill makes permanent the authorization for the delivery of health care services through telehealth by telephone that was provided through executive order during the declared public health emergency related to COVID-19.

Under current law, health insurance carriers are required to reimburse for services delivered through telehealth at parity with the reimbursement that would be provided if the services were delivered through an in-person consultation, but the use of audio-only telephone to deliver those services is not permitted. This bill removes that prohibition. The bill also clarifies that reimbursement for telehealth services must be made on the same basis and at the same rate as if the services were delivered in person and that a carrier may not establish separate deductible limits for telehealth services that are not applied in the aggregate with other services covered under a health plan.

Under current law, telehealth services reimbursed under the MaineCare program for the delivery of service using the telephone are limited to when interactive telehealth services are unavailable or when a telephonic service is medically appropriate for the underlying covered service. This bill removes that limitation and also clarifies that services provided through telehealth must be reimbursed at the same rate as comparable services provided through an in-person consultation.

The requirements in the bill apply to health plans issued or renewed on or after January 1, 2022.
