Testimony on

L.D. 220 "An Act To Ban the United Nations Agenda 21 in Maine"

Presented by Representative Rick Long
District 9

Judiciary March 5, 2013

Good afternoon Senator Valentino, Representative Priest, and members of the Joint Standing Committee on Judiciary.

I am State Representative Rick Long, representing District 9. I come before you today to present L.D. 220, "An Act To Ban the United Nations Agenda 21 in Maine."

This bill prohibits the State, any governing body, or quasi-governing body to implement or adopt any policies set forth by the United Nations at their conference on Environment and Development held in Brazil during June of 1992. This group of policies are known as the Agenda 21 plan.

This plan consists of 351 pages and can be read in its entirety by visiting http://sustainabledevelopment.un.org/content/documents/Agenda21.pdf. I have also provided a copy of the table of contents and the preamble for you.

At a quick glance, this appears to be well-intentioned but upon reading through the document it becomes clear that the intent would restrict private property rights without due process at the state and local levels. It would also threaten the sovereignty of our government, as well as our established policies and civil liberties by binding us to a contract of global governance.

In closing, I urge you to support this piece of legislation. The Honorable Henry Joy can answer in detail any questions you may have.

Thank you for your time.

District 9 Bancroft, Crystal, Dyer Brook, Haynesville, Hersey, Island Falls, Linneus, Ludlow, Merrill, Mount Chase, New Limerick, Oakfield, Patten, Sherman, Smyrna, Stacyville, Weston and Plantations of Glenwood, Macwahoc, Moro and Reed, plus the unorganized territories of North Penobscot (part, including Herseytown Township) and South Aroostook (including Benedicta, Molunkus and Silver Ridge Townships)

Printed on recycled paper

United Nations Conference on Environment & Development Rio de Janerio, Brazil, 3 to 14 June 1992

AGENDA 21

CONTENTS

· · · · · ·	
Chapter 1. Preamble	Paragraphs 1.1 - 1.6
SECTION I. SOCIAL AND ECONOMIC DIMENSIONS	
2. International cooperation to accelerate sustainable development in developing countries and related domestic policies	2.1 - 2.43
3. Combating poverty	3.1 - 3.12
4. Changing consumption patterns	4.1 - 4.27
5. Demographic dynamics and sustainability6. Protecting and promoting human health conditions	5.1 - 5.66 6.1 - 6.46
7. Promoting sustainable human settlement development	7.1 - 7.80
8. Integrating environment and development in decision-making	8.1 - 8.54
SECTION II. CONSERVATION AND MANAGEMENT OF RESOURCES FOR DEVELOPMENT	
SECTION II. CONSERVATION AND MANAGEMENT OF RESOURCES FOR DEVELOPMENT	
9. Protection of the atmosphere	9.1 - 9.35
10. Integrated approach to the planning and management of land resources	10.1 - 10.18
11. Combating deforestation	11.1 - 11.40
12. Managing fragile ecosystems: combating desertification and drought	12.1 - 12.63
13. Managing fragile ecosystems: sustainable mountain development	13.1 - 13.24
Promoting sustainable agriculture and rural development Conservation of biological diversity	14.1 - 14.104
16. Environmentally sound management of biotechnology	15.1 - 15.11 16.1 - 16.46
17. Protection of the oceans, all kinds of seas, including enclosed and semi-enclosed seas, and coastal	
areas and the protection, rational use and development of their living resources	17.1 - 17.136
18. Protection of the quality and supply of freshwater resources: application of integrated approaches to the development, management and use of water resources	18.1 - 18.90
19. Environmentally sound management of toxic chemicals, including prevention of illegal international traffic in toxic and dangerous products	¹ 19.1 - 19.76
20. Environmentally sound management of hazardous wastes, in hazardous wastes	20.1 - 20.46
21. Environmentally sound management of solid wastes and sewage-related issues	21.1 - 21.49
22. Safe and environmentally sound management of radioactive wastes	22.1 - 22.9
SECTION III. STRENGTHENING THE ROLE OF MAJOR GROUPS	
23. Preamble	23.1 - 23.4
24. Global action for women towards sustainable and equitable development	24.1 - 24.12

27. Strengthening the role of non-governmental organizations: partners for sustainable development	27.1 - 27.13
28. Local authorities' initiatives in support of Agenda 21	28.1 - 28.7
29. Strengthening the role of workers and their trade unions	29.1 - 29.14
30. Strengthening the role of business and industry 31. Scientific and technological community	30.1 - 30.30
51. Scientific and technological community	31.1 - 31.12

Agenda 21 - Chapter 1 PREAMBLE

- 1.1. Humanity stands at a defining moment in history. We are confronted with a perpetuation of disparities between and within nations, a worsening of poverty, hunger, ill health and illiteracy, and the continuing deterioration of the ecosystems on which we depend for our well-being. However, integration of environment and development concerns and greater attention to them will lead to the fulfilment of basic needs, improved living standards for all, better protected and managed ecosystems and a safer, more prosperous future. No nation can achieve this on its own; but together we can in a global partnership for sustainable development.
- 1.2. This global partnership must build on the premises of General Assembly resolution 44/228 of 22 December 1989, which was adopted when the nations of the world called for the United Nations Conference on Environment and Development, and on the acceptance of the need to take a balanced and integrated approach to environment and development questions.
- 1.3. Agenda 21 addresses the pressing problems of today and also aims at preparing the world for the challenges of the next century. It reflects a global consensus and political commitment at the highest level on development and environment cooperation. Its successful implementation is first and foremost the responsibility of Governments. National strategies, plans, policies and processes are crucial in achieving this. International cooperation should support and supplement such national efforts. In this context, the United Nations system has a key role to play. Other international, regional and subregional organizations are also called upon to contribute to this effort. The broadest public participation and the active involvement of the non-governmental organizations and other groups should also be encouraged.
- 1.4. The developmental and environmental objectives of Agenda 21 will require a substantial flow of new and additional financial resources to developing countries, in order to cover the incremental costs for the actions they have to undertake to deal with global environmental problems and to accelerate sustainable development. Financial resources are also required for strengthening the capacity of international institutions for the implementation of Agenda 21. An indicative order-of-magnitude assessment of costs is included in each of the programme areas. This assessment will need to be examined and refined by the relevant implementing agencies and organizations.
- 1.5. In the implementation of the relevant programme areas identified in Agenda 21, special attention should be given to the particular circumstances facing the economies in transition. It must also be recognized that these countries are facing unprecedented challenges in transforming their economies, in some cases in the midst of considerable social and political tension.
- 1.6. The programme areas that constitute Agenda 21 are described in terms of the basis for action, objectives, activities and means of implementation. Agenda 21 is a dynamic programme. It will be carried out by the various actors according to the different situations, capacities and priorities of countries and regions in full respect of all the principles contained in the Rio Declaration on Environment and Development. It could evolve over time in the light of changing needs and circumstances. This process marks the beginning of a new global partnership for sustainable development.

* When the term "Governments" is used, it will be deemed to include the European Economic Community within its areas of competence. Throughout Agenda 21 the term "environmentally sound" means "environmentally safe and sound", in particular when applied to the terms "energy sources", "energy supplies", "energy systems" and "technology" or "technologies".
