§2641. Source of public water supply defined

As used in this subchapter, unless the context otherwise indicates, "public water source" means any natural or man-made impoundment, pond or lake or ground water aquifer whose waters are transported or delivered by a public water system, as defined in section 2601, subsection 8. Where the intake of a public water supply is on the outlet of any impoundment, pond or lake, the source of such public water supply shall be considered to be the impoundment, pond or lake itself. [PL 1975, c. 785, §4 (RPR).]
