32 §1102-B. PERMITS AND INSPECTIONS

1. Permits required. Except as otherwise provided in this section, no electrical equipment may be installed or altered unless the person making the installation first obtains a permit from the Electrician's Examining Board.

[1981, c. 432, §2 (NEW) .]

2. Application procedure. An application for a permit must be made in a form prescribed by the board together with any plans, specifications or schedules the board may require. If the board determines that the installation or alteration planned is in compliance with all applicable statutes, ordinances and rules, it shall issue a permit, provided that the fee required under subsection 4 has been paid.

[2001, c. 323, §17 (AMD) .]

3. Inspection required. When the installation or alteration is completed, the person making the installation or alteration shall notify the state electrical inspector. The inspector shall inspect the installation within a reasonable time so as not to cause undue delay in the progress of the construction contract or installation. The inspector shall determine whether the installation complies with all applicable statutes, ordinances and rules. If the inspector determines that the installation does not so comply, the procedures set forth in section 1104 apply. Any utility corporation must require proof of permit prior to connecting power to the installation.

4. Procedures and fees. Pursuant to the Maine Administrative Procedure Act, Title 5, chapter 375, the board may adopt procedures for permit applications and the conduct of inspections. The combined service fee for permit and inspection must be paid with every application for a permit. The Director of the Office of Licensing and Registration shall adopt by rule a schedule of appropriate service fees, but in no event may any scheduled service fee exceed \$100. Rules adopted pursuant to this subsection are routine technical rules pursuant to Title 5, chapter 375, subchapter II-A.

[2001, c. 323, §17 (AMD) .]
