## SUMMARY

This amendment replaces the bill. Beginning January 1, 2010, it increases the threshold amount for nursing facility projects to \$1,000,000. It exempts from the full certificate of need approval certain nursing facility projects including capital expenditures under limited circumstances, nonmedical replacement equipment, information systems, communication systems, parking lots, garages and projects that implement certain energy-efficient improvements. It requires the costs associated with energy-efficient projects to be excluded from the total cost of a project in determining whether the project is subject to review. It requires the department to amend the rules governing special reimbursement provisions for energy-efficient improvements and to include requirements that the Department of Health and Human Services respond to provider requests for prior approval of energy-efficient improvements within 30 days following the receipt of a request supported by sufficient information.
