Act To Support and Improve Municipal Recycling Programs and Save Taxpayer Money

Received by the Clerk of the House on April 20, 2021. Referred to the Committee on Environment and Natural Resources pursuant to Joint Rule 308.2 and ordered printed pursuant to Joint Rule 401.

Be it enacted by the People of the State of Maine as follows:

Sec. 1. 38 MRSA §2146 is enacted to read:

§2146. Stewardship program for packaging
1. Definitions. As used in this section, unless the context otherwise indicates, the following terms have the following meanings.
A. "Alternative collection program" means a program for the management of packaging material that is operated by an individual producer or group of producers and that has been approved by the department in accordance with subsection 8.
B. "Brand" has the same meaning as in section 1771, subsection 1.
C. "Collection" means the gathering of waste, including the preliminary sorting and storage of waste for the purposes of transport to a recycling establishment.
D. "Franchisee" means a person that is granted a franchise by a franchisor authorizing the use of the franchisor's trade name, service mark or related characteristic and the sharing of the franchisor's proprietary knowledge or processes pursuant to an oral or written arrangement for a definite or indefinite period.
E. "Franchisor" means a person that grants to a franchisee a franchise authorizing the use of the person's trade name, service mark or related characteristic and the sharing of the person's proprietary knowledge or processes pursuant to an oral or written arrangement for a definite or indefinite period.
F. "Low-volume producer" means a producer that sold, offered for sale or distributed for sale in or into the State during the prior calendar year products contained, protected, delivered, presented or distributed in or using more than one ton but less than 15 tons of packaging material in total.
G. "Municipality" means a city, town, county, township, village or plantation; a refuse disposal district under chapter 17; or a regional association.
H. "Packaging material" means a discrete type of material, or a category of material that includes multiple discrete types of material with similar management requirements and similar commodity values, used for the containment, protection, delivery, presentation or distribution of a product, including a product sold over the Internet, at the time that the product leaves a point of sale with or is received by the consumer of the product. "Packaging material" does not include a discrete type of material, or a category of material that includes multiple discrete types of material, that is:
   (1) Intended to be used for the long-term storage or protection of a durable product and that can be expected to be usable for that purpose for a period of at least 5 years;
   (2) A beverage container, as defined in section 3102, subsection 2, subject to the requirements of chapter 33; or
   (3) A container for architectural paint, as defined in section 2144, subsection 1, paragraph A, that is collected through a paint stewardship program that is in operation and that has been approved by the department pursuant to section 2144, as long as the stewardship organization operating that program:
(a) Has demonstrated to the department's satisfaction that it recycles at least 90% of the containers of architectural paint collected under the program; or

(b) Subject to the approval of the department, if unable to satisfy the requirements of division (a), has demonstrated to the department's satisfaction that it recycles at least 80% of the containers of architectural paint collected under the program.

I. "Packaging stewardship fund" or "fund" means a privately held account established and managed by the stewardship organization pursuant to subsection 12.

J. "Packaging stewardship organization" or "stewardship organization" means the entity contracted by the department under subsection 3 to operate the packaging stewardship program.

K. "Packaging stewardship program" or "program" means the program implemented under this section by the stewardship organization to assess and collect payments from producers based on the weight of packaging material sold, offered for sale or distributed for sale in or into the State by each producer and to reimburse participating municipalities for certain municipal recycling and waste management costs.

L. "Participating municipality" means a municipality that has complied with the requirements of subsection 9 and is eligible for reimbursement of certain costs in accordance with subsection 10.

M. "Post-consumer recycled material" means new material produced using material resulting from the recovery, separation, collection and reprocessing of material that would otherwise be disposed of or processed as waste and that was originally sold for consumption. "Post-consumer recycled material" does not include post-industrial material or pre-consumer material.

N. "Producer" means a person that:

   (1) Has legal ownership of the brand of a product sold, offered for sale or distributed for sale in or into the State contained, protected, delivered, presented or distributed in or using packaging material; or

   (2) Imports into the State for sale, offer for sale or distribution for sale in or into the State a product contained, protected, delivered, presented or distributed in or using packaging material that is branded by a person that meets the requirements of subparagraph (1) and has no physical presence in the United States.

"Producer" includes a low-volume producer and a franchisor of a franchise located in the State, but does not include the franchisee operating that franchise. "Producer" does not include a nonprofit organization exempt from taxation under the United States Internal Revenue Code, Section 501(c)(3).

O. "Proprietary information" has the same meaning as in section 1771, subsection 6-A.

P. "Readily recyclable" means, with respect to a type of packaging material, that the type of packaging material, as determined by the department by rule:

   (1) Can be sorted by entities that process recyclable material generated in the State; and
.Has a consistent market for purchase. For the purposes of this subparagraph, "consistent market for purchase" means, with respect to a type of packaging material, that entities processing recyclable material are willing to purchase full bales of that type of fully sorted packaging material in quantities equal to or in excess of the supply of that fully sorted packaging material.

"Readily recyclable" does not include types of packaging material that entities that process recyclable material generally accept only in small quantities or that such entities typically sort out from other recyclable material during processing.

Q. "Recycling" has the same meaning as in section 1771, subsection 7.

R. "Reuse" has the same meaning as in section 1771, subsection 8.

S. "Similar municipalities" means 2 or more municipalities that, as determined by department rule in accordance with rules adopted pursuant to subsection 13, paragraph A, subparagraph (3), have similar population sizes, geographic locations, proximity to resources and regional recycling capacity and other factors determined by the department to affect the costs associated with the collection, processing, transportation and recycling or disposal of packaging material by municipalities.

T. "Toxicity" means, with respect to packaging material, the presence in packaging material or the use in the manufacturing, recycling or disposal of packaging material of intentionally introduced metals or chemicals regulated pursuant to Title 32, chapter 26-A; food contact chemicals of high concern or priority food contact chemicals regulated pursuant to Title 32, chapter 26-B; or chemicals of concern, chemicals of high concern or priority chemicals identified pursuant to chapter 16-D.

2. Producer exemptions. Notwithstanding any provision of this section to the contrary, a producer is exempt from the requirements and prohibitions of this section in any calendar year in which:

A. The producer realized less than $2,000,000 in total gross revenue during the prior calendar year;

B. The producer sold, offered for sale or distributed for sale in or into the State during the prior calendar year products contained, protected, delivered, presented or distributed in or using less than one ton of packaging material in total; or

C. The producer realized more than 50% of its total gross revenue in the prior calendar year from the sale of goods it acquired through insurance salvages, closeouts, bankruptcies and liquidations.

A producer claiming an exemption under this subsection shall provide to the department sufficient information to demonstrate that the producer meets the requirements for an exemption under this subsection within 30 days of receiving a request from the department to provide such information.

3. Selection of stewardship organization: contract. Consistent with the requirements of this subsection, the department shall select and enter into a contract with a packaging stewardship organization to operate the packaging stewardship program under this section.

A. No later than May 1, 2022, and consistent with applicable competitive bidding requirements under state purchasing laws, the department shall issue a request for
proposals for the operation of the packaging stewardship program by a packaging stewardship organization. The proposals must be required to cover a 10-year operation of the packaging stewardship program by the successful bidder and must be required to include, at a minimum:

(1) A description of how the bidder will administer the stewardship organization, including:
   (a) The mechanism or process, to be developed with input from producers, by which a producer may request and receive assistance from the stewardship organization in the reporting of required information and regarding methods by which the packaging material used by a producer may be modified so as to reduce the producer's payment obligations under subsection 6; and
   (b) The mechanism or process, to be developed with input from municipalities, by which a participating municipality may request and receive assistance from the stewardship organization in the reporting of required information and regarding methods by which a municipality's recycling program may be modified so as to increase access to and participation in the program;

(2) A description of how the bidder intends to solicit and consider input from interested persons, including, but not limited to, producers, municipalities, environmental organizations and waste management and recycling establishments, regarding the bidder's operation of the packaging stewardship program, if selected;

(3) A description of how the bidder intends to establish and manage the packaging stewardship fund consistent with subsection 12, including, but not limited to: the staffing the bidder intends to use for management of the fund; a plan to ensure equity of access to the fund for financially challenged or otherwise disadvantaged municipalities or communities; a plan for providing technical support to producers and municipalities regarding program requirements; and a plan for administering payments to and reimbursements from the fund and the financial mechanisms, including investment types, if any, the bidder intends to use in managing the fund;

(4) A proposed financial assurance plan that ensures all funds held in the packaging stewardship fund are immediately and exclusively forfeited and transferred to or otherwise made immediately available to the department to support waste diversion, reuse or recycling programs when the stewardship organization's contract with the department is terminated by the department or expires, unless the stewardship organization enters into a new contract with the department in accordance with paragraph B prior to the expiration of the stewardship organization's existing contract;

(5) A proposed budget outlining the anticipated costs of operating the packaging stewardship program, including identification of any start-up costs that will not be ongoing and a description of the method by which the bidder intends to determine and collect producer payments during the initial start-up period of program operation to fund the program's operational costs during that initial start-up period and to reimburse or require additional payments by those producers subsequent to that initial start-up period based on producer reporting of the actual amount of packaging material sold, offered for sale or distributed for sale in or into the State by each producer during that initial start-up period. The proposed budget under this
(6) A certification that the bidder will not share, except with the department, information provided to the bidder by a producer that is proprietary information and that is identified by the producer as proprietary information. The certification must include a description of the methods by which the bidder intends to ensure the confidentiality of such information;

(7) A description of how the bidder will conduct representative audits of recyclable material processed and sold by facilities that process recyclable material generated in the State, which must include, but is not limited to:

   (a) A description of the sampling techniques to be used in those audits, which must include random sampling;

   (b) A description of how those audits, at a minimum, will be designed to solicit information regarding the extent to which recyclable material processed and sold by those facilities reflects the tons of each type of packaging material collected in the State for recycling and the tons of each type of packaging material recycled in the State, as well as the ultimate destination of and intended use for that recycled material;

   (c) A description of how those audits will be designed so that information obtained through the audit of one facility will not be used to infer information about a different facility that uses different processing equipment, different sorting processes or different staffing levels to conduct such processing; and

   (d) A description of the process by which a facility will be allowed to request and receive an audit if it can credibly demonstrate that an audit result being applied to its material output is not representative of its current operations;

(8) A description of how the bidder will conduct representative audits of municipal solid waste disposed of in the State and representative audits of waste littered in the State, which must include, but is not limited to:

   (a) A description of the sampling techniques to be used in those audits, which must include random sampling;

   (b) For waste disposal audits, a description of the types and weight of packaging material in the waste stream and the percentage by weight and volume of the waste stream that is composed of packaging material; and

   (c) For litter audits, a description of packaging material type by weight in the sampled litter, identification of the producer or producers of the packaging material in the sampled litter, if identifiable, and an evaluation based on those audits regarding the areas of the State in which litter accumulation is greatest; and

(9) Any additional information required by the department.

B. In accordance with applicable requirements of state purchasing laws, the department shall enter into a contract with a bidder that has submitted a proposal in accordance with the requirements of this subsection, the term of which must cover 10
years of operation of the packaging stewardship program by the stewardship organization. The contract must, at a minimum, include provisions to ensure that the stewardship organization will operate the program in accordance with all applicable statutory requirements and the rules adopted by the department under this section.

If, at the close of the competitive bidding process under this subsection, the department determines that no bidder has submitted, in accordance with this subsection, a proposal that meets the requirements of this subsection, the department may reopen a new competitive bidding process under this subsection.

4. Prohibition; producer compliance information. This subsection governs the sale or distribution in the State of products with packaging not in compliance with the requirements of this section and sets forth requirements for the collection and publication of compliance information.

A. Beginning one calendar year following the effective date of the contract entered into by the department and the stewardship organization pursuant to subsection 3:

1. A producer may not sell, offer for sale or distribute for sale in or into the State a product contained, protected, delivered, presented or distributed in or using packaging material for which the producer has not complied with all applicable requirements of this section; and

2. A retailer may not sell, offer for sale or distribute for sale in or into the State a product contained, protected, delivered, presented or distributed in or using packaging material if, based on the information made available by the department pursuant to paragraph C, the product is contained, protected, delivered, presented or distributed in or using packaging material for which its producer has not complied with all applicable requirements of this section.

B. At the department's request, the stewardship organization shall provide to the department a list of producers that are participating in the program and are compliant with the program's requirements and, if known to the stewardship organization, a list of producers that are not participating in the program and are not compliant with the program's requirements.

C. Based on information provided to the department under paragraph B and any other information considered by the department, the department shall make available on its publicly accessible website a regularly updated list of producers that the department has determined are compliant with all applicable requirements of this section and a list of producers and, where applicable, specific products for which the department has determined the producer has not complied with all applicable requirements of this section. The department shall conduct outreach to retailers to provide notification of the information made available under this paragraph and any changes to that information.

5. Annual reporting by stewardship organization. Beginning one calendar year following the effective date of the contract entered into by the department and the stewardship organization pursuant to subsection 3, and annually thereafter, the stewardship organization shall submit to the department and make available on its publicly accessible website a report that includes, at a minimum, the following information:

A. Contact information for the stewardship organization:
B. A list of participating producers and the brands of products associated with those producers;

C. The total weight of each type of packaging material sold, offered for sale or distributed for sale in or into the State by each participating producer as reported in accordance with subsection 7;

D. As applicable, the total weight of each type of packaging material collected and managed by each participating producer through alternative collection programs approved by the department under subsection 8;

E. A complete accounting of payments made to and by the stewardship organization during the prior calendar year, including information on how the stewardship organization determined the amount of such payments in accordance with subsections 6 and 10 and the rules adopted under subsection 13, paragraph A, subparagraphs (1) and (4);

F. A list of producers that are not participating in the program that are required to participate in the program and any product-specific noncompliance, if known by the stewardship organization;

G. A description of education and infrastructure investments made by the stewardship organization in prior calendar years and an evaluation of how those investments were designed to increase access to recycling in the State and to encourage the reuse of packaging material;

H. A description of the results of the representative audits required pursuant to subsection 3, paragraph A, subparagraphs (7) and (8);

I. An assessment of the progress made toward the achievement of any program goals required by the department by rule pursuant to subsection 13, paragraph D;

J. An assessment of whether the payment schedule for producer payments adopted by the department by rule pursuant to subsection 13, paragraph A, subparagraph (1) has been successful in incentivizing improvements to the design of packaging material as encouraged through the allowance of payment adjustments in accordance with subsection 6, paragraph D;

K. Any proposals for changes to the packaging stewardship program or investments in education and infrastructure designed to reduce the amount of packaging material used, increase access to recycling, increase the recycling of or recyclability of packaging material, reduce program costs or otherwise increase program efficiency, which may include an analysis of best practices for municipal recycling programs;

L. The results of a 3rd-party financial audit of the stewardship organization; and

M. Any additional information required by the department.

6. Producer payments. In accordance with the provisions of this subsection and the rules adopted by the department, no later than 180 days after the effective date of the contract entered into by the department and the stewardship organization pursuant to subsection 3, and annually thereafter, a producer shall make payments to the stewardship organization to be deposited into the packaging stewardship fund under subsection 12 based on the net weight of each type of packaging material sold, offered for sale or distributed for sale in or into the State by the producer and not managed by the producer.
under an approved alternative collection program. The department shall adopt rules setting forth the manner in which such payments must be calculated, which must include, but are not limited to, provisions that:

A. Require the amount of a producer's payment to include that producer's share of the program's operational costs as set forth in the proposed budget under subsection 3, paragraph A, subparagraph (5) and that producer's share of the administrative and enforcement costs incurred by the department pursuant to this section;

B. Require the amount of a producer's payment to reflect the per-ton costs associated with the collection, processing, transportation and recycling or disposal of the producer's packaging material by municipalities and the costs associated with increasing access to recycling of that packaging material type through investments in infrastructure and education under subsection 11;

C. Allow a low-volume producer to elect to pay a flat fee in lieu of a material-specific producer payment calculated pursuant to this subsection, provided that a producer seeking to pay a flat fee as a low-volume producer pursuant to this paragraph must submit to the department the information necessary to demonstrate that the producer meets the definition of "low-volume producer." The department may adopt rules that relieve a producer from paying fees under this subsection with respect to packaging material acquired by the producer through insurance salvage, closeout, bankruptcy or liquidation; and

D. Through an adjustment of a producer's payment responsibility calculated in accordance with this subsection and subsection 13, paragraph A, subparagraph (1), encourage packaging material waste reduction; the reuse of packaging material; the use of readily recyclable materials in packaging material; the reduction of the toxicity of packaging material; the use of post-consumer recycled material in packaging material provided that such use does not increase the toxicity of packaging material; the reduction of litter from packaging material; the use of single-material packaging that includes prominent and easily understandable recycling or disposal instructions for consumers or other design characteristics intended to reduce consumer confusion regarding recyclability and to reduce recycling contamination; any other incentives designed to support the management of packaging material consistent with the solid waste management hierarchy in section 2101.

Unless otherwise approved by the stewardship organization, a producer, other than a low-volume producer, that makes a payment required pursuant to this subsection shall submit the payment to the stewardship organization at the same time that it submits its annual report to the stewardship organization required pursuant to subsection 7.

7. Annual reporting by producers. Beginning no later than 180 days after the effective date of the contract entered into by the department and the stewardship organization pursuant to subsection 3, and annually thereafter, a producer shall report to the stewardship organization the total weight of each type of packaging material sold, offered for sale or distributed for sale in or into the State by the producer in the prior calendar year.

A. The report must include a description of the methods used by the producer in determining the amounts reported for each type of packaging material, a description of the characteristics of each type of packaging material reported that are relevant to the
payment adjustment criteria adopted by the department by rule pursuant to subsection 6, paragraph D and a list of all of the producer's brands associated with each type of packaging material.

B. A low-volume producer that elects to pay a flat fee determined by the department by rule adopted pursuant to subsection 6, paragraph C is not required to submit an annual report to the stewardship organization under this subsection.

C. The department shall adopt rules that authorize a producer that is unable to fully satisfy the reporting requirements of this subsection due to a failure to obtain sufficient information regarding the characteristics of the packaging material the producer sells, offers for sale or distributes for sale in or into the State to alternatively report to the stewardship organization an estimate of the total weight of the producer's packaging material based on unit quantities, provided that such alternative reporting includes a description of the methods used by the producer to calculate such estimates.

8. Alternative collection programs. In accordance with the requirements of this subsection and the rules adopted by the department, a producer or group of producers may develop and operate an alternative collection program to collect and manage a type or types of packaging material sold, offered for sale or distributed for sale in or into the State by the producer or producers. A producer that manages a type of packaging material under an approved alternative collection program through reuse, recycling and, where approved by the department, management of that packaging material through incineration may wholly or partially offset the producer's payment obligations under the packaging stewardship program with respect to that same type of packaging material only.

A. Beginning on the effective date of the contract entered into by the department and the stewardship organization pursuant to subsection 3, a producer or group of producers seeking to implement an alternative collection program shall submit a proposal for the establishment of that program to the department for approval. The department shall approve or deny the proposal within 120 days of receipt and shall provide an opportunity for public review and comment on the proposal prior to its approval or denial. The department may approve an alternative collection program for a term of 5 years and, at the expiration of such term, the producer or group of producers operating the program may submit an updated proposal to the department for approval.

B. In determining whether to approve a proposed alternative collection program, the department shall consider:

(1) Whether the alternative collection program will provide year-round, convenient, free, statewide collection opportunities for the types of packaging material to be collected under that program;

(2) To what extent the alternative collection program intends to manage those types of packaging material to be collected under the program through reuse for an original purpose, through recycling or through disposal at an incineration facility. The department may not approve an alternative collection program that proposes management of a packaging material type through disposal at an incineration facility unless that packaging material is not readily recyclable and the program proposes a process to begin reuse or recycling of that type of packaging material within a period of 3 years or less;
(3) Whether the education and outreach strategies proposed for the alternative
collection program can be expected to significantly increase consumer awareness
of the program throughout the State;

(4) How the alternative collection program intends to accurately measure the
weight of each packaging material type collected, reused, recycled, disposed of at
an incineration facility or otherwise managed under the program; and

(5) To what extent approval of the alternative collection program may
disproportionately impact any community in the State.

C. A proposed modification to an approved alternative collection program must be
submitted to the department for written approval. The department shall approve or
deny a proposed modification based on application of the criteria described in
paragraph B. The department may waive payment of any fees associated with review
and approval of a proposed modification to an approved alternative collection program
if the review of the proposed modification does not require significant department staff
time.

D. Beginning no later than 180 days after the effective date of the contract entered into
by the department and the stewardship organization pursuant to subsection 3, and
annually thereafter, a producer or producers managing an approved alternative
collection program shall report annually to the stewardship organization and to the
department the following information:

(1) The total tons of each type of packaging material collected, reused, recycled,
disposed of at an incineration facility or otherwise managed under the alternative
collection program in the prior calendar year, including a breakdown of the total
tons of each type of material to be credited to each producer participating in the
alternative collection program;

(2) A list of the collection opportunities in the State for the types of packaging
material managed under the alternative collection program that were made
available in the prior calendar year;

(3) A description of the education and outreach strategies implemented by the
alternative collection program in the prior calendar year to increase consumer
awareness of the program throughout the State; and

(4) Any additional information required by the department.

E. If the department determines that an approved alternative collection program is not
operating in a manner consistent with the proposal approved under this subsection or
the provisions of this subsection, the department shall provide written notice to the
producer or producers operating the alternative collection program regarding the nature
of the deficiency, the actions necessary to correct the deficiency and the time by which
such actions must be implemented. If the department determines that the producer or
group of producers have failed to implement the actions described in the written notice
within the required time frame, the department shall notify the producers or group of
producers as well as the stewardship organization in writing that the producer or group
of producers are ineligible to offset payment obligations under the packaging
stewardship program based on packaging material managed under the alternative
collection program.
9. Requirements for participating municipalities. In accordance with the provisions of this subsection and the rules adopted by the department, a municipality may elect to, but is not required to, participate in the packaging stewardship program under this section. To be eligible for reimbursement of costs under subsection 10 as a participating municipality, a municipality must, at a minimum:

A. Provide for the collection and recycling of packaging material that is generated in the municipality and is readily recyclable; and

B. Annually report to the stewardship organization, on a form provided and approved by the department, all information necessary for the stewardship organization to determine the municipality's incurred costs associated with its collection, processing, transportation and recycling or disposal of recyclable material and of municipal solid waste.

Two or more municipalities, municipally owned solid waste processing facilities or quasi-municipal entities that manage waste materials on behalf of a municipality may elect to jointly report to the stewardship organization as required by paragraph B and to jointly receive reimbursement payments pursuant to subsection 10 from the stewardship organization.

10. Municipal reimbursements. In accordance with the rules adopted by the department pursuant to subsection 13, paragraph A, subparagraph (4), the stewardship organization shall annually disburse to participating municipalities from the packaging stewardship fund established under subsection 12 reimbursement payments for the median per-ton cost of managing packaging material that is readily recyclable, reimbursement payments for the median per-ton cost of managing packaging material that is not readily recyclable and per capita payments associated with packaging material disposed of by participating municipalities. For the purposes of this subsection, the cost to a municipality of managing packaging material may include, but is not limited to, the costs associated with the collection of packaging material, the costs associated with the transportation of packaging material to a recycling establishment or disposal facility and the costs associated with the cleanup and abatement of packaging material litter.

A. In accordance with rules adopted by the department, the stewardship organization shall determine the amount of payments to participating municipalities under this subsection based on the following information:

1) Information provided by participating municipalities to the stewardship organization in accordance with subsection 9, paragraph B regarding the costs incurred by those municipalities in recycling packaging material that is readily recyclable and packaging material that is not readily recyclable and the tons of municipal solid waste disposed of in those municipalities, including, but not limited to, waste disposed of in public spaces and schools, which may include packaging material collected for recycling or disposal in public spaces and schools;

2) Information provided to the department by recycling establishments pursuant to section 2145 and aggregated and made available by the department to the stewardship organization, including the tons of recyclable material received by each recycling establishment from each municipality and the tons of processed recyclable material sold by each recycling establishment;
(3) Information provided to the department by recycling establishments not located in the State or by participating municipalities and made available by the department to the stewardship organization regarding the tons of recyclable material brokered by those municipalities to those recycling establishments and processed and sold by those recycling establishments;

(4) Information obtained by the stewardship organization through the audits of facilities that process recyclable material generated in the State as required by subsection 3, paragraph A, subparagraph (7); and

(5) Any other information specified by the department by rule.

B. In accordance with procedures and requirements adopted by the department by rule, the stewardship organization shall use the information described in paragraph A to determine the total tons of each packaging material type recycled by all municipalities at each recycling establishment and the percentage of those total tons attributable to each participating municipality. In the case of 2 or more municipalities that jointly send recyclable material to a recycling establishment, the stewardship organization shall assume that an equal amount of the jointly sent material is attributable to each resident of each municipality unless those municipalities by agreement identify an unequal per capita division of that jointly sent material for the purposes of this subsection.

11. Investments in education and infrastructure. In accordance with the provisions of this subsection and as approved by the department, the stewardship organization shall biannually provide for the expenditure of funds within the packaging stewardship fund established under subsection 12 that are designed to improve recycling education and infrastructure in the State.

A. The total amount of investments in education and infrastructure made by the stewardship organization pursuant to this subsection must be directly proportional to the total amount of payments received from all producers for all packaging material that is not readily recyclable and is not actually recycled.

B. Biannually, the department shall solicit proposals for investments in education and infrastructure. A municipality or group of municipalities, a business or a recycling establishment may apply to the department to receive funding from the stewardship organization for a proposed investment in education and infrastructure. The department shall review investment proposals received pursuant to this paragraph and shall solicit input on those proposals from producers, participating municipalities and recycling establishments.

C. After determining the total amount of funds required for investment in accordance with paragraph A and considering the input received pursuant to paragraph B, the department shall direct the stewardship organization to award funds to applicants that submitted proposals pursuant to paragraph B. The department shall ensure that preference for funding is given to proposals that support the State's solid waste management hierarchy under section 2101, promote a circular economy for packaging material types for which producers were required to make payments under subsection 6, increase the recyclability of packaging material that is not readily recyclable, increase access to recycling infrastructure in the State, improve consumer education in the State regarding recycling and recyclability and support recycling and education efforts in financially challenged or otherwise disadvantaged municipalities or
communities and in other municipalities or communities that have received minimal or no prior funding pursuant to this paragraph.

12. Packaging stewardship fund; authorized expenditures. In accordance with the provisions of this subsection and the rules adopted by the department, the stewardship organization shall establish and manage a packaging stewardship fund. The stewardship organization shall deposit into the fund all payments received from producers in accordance with subsection 6 and shall expend those funds for the following purposes:

A. To reimburse participating municipalities in accordance with applicable provisions in subsections 9, 10 and 13 and the applicable rules adopted by the department pursuant to those subsections;

B. To cover the operating costs of the stewardship organization, which must be annually verified by a 3rd-party financial audit paid for by the stewardship organization as required by subsection 5, paragraph L;

C. To pay to the department all applicable fees required under subsection 13, paragraph B, including reimbursement of any costs incurred by the department in adopting rules and in administering and enforcing this section prior to the effective date of the contract entered into by the department and the stewardship organization pursuant to subsection 3; and

D. To support investments in education and infrastructure made in accordance with subsection 11.

13. Administration and enforcement; rulemaking; fees; department report. The department shall administer and enforce this section and shall adopt rules as necessary to implement, administer and enforce this section. Rules adopted pursuant to this section are routine technical rules as defined in Title 5, chapter 375, subchapter 2-A.

A. Rules adopted by the department pursuant to this section must include, at a minimum:

(1) A process for annually determining a schedule of producer payments required under subsection 6, which must include a flat fee option for low-volume producers pursuant to subsection 6, paragraph C.

   (a) The payment schedule adopted under this subparagraph must be designed to ensure that the total amount of payments collected each year is equal to or in excess of the anticipated amount of expenditures required pursuant to subsection 12, paragraphs A to D.

   (b) The payment schedule adopted under this subparagraph must provide for a flat fee option to be assessed on a tiered basis such that a low-volume producer is required to pay no more than $500 per ton of packaging material and no more than $7,500 in total annual fees to the stewardship organization under this section;

(2) A process for determining on an annual basis those types of packaging material that are readily recyclable, which must involve consultation with the stewardship organization and recycling establishments and must include a transitional period between the time that a type of packaging material is determined to be readily recyclable or to not be readily recyclable and the time that such determinations will
be effective for the purposes of calculating producer payments and municipal
reimbursements in accordance with this section;

(3) A process for determining on an annual basis which municipalities are similar
municipalities, which must involve consultation with participating municipalities;

(4) For purposes of determining participating municipality reimbursements under
subsection 10, a process for determining the median per-ton cost of managing
packaging material that is readily recyclable, the median per-ton cost of managing
packaging material that is not readily recyclable and the costs associated with the
disposal of packaging material by participating municipalities, which must involve
consultation with participating municipalities; and

(5) Requirements for the assessment of program performance by the stewardship
organization, including the setting of program goals used to inform the producer
payment schedule determined pursuant to subparagraph (1) and the investments in
infrastructure and education made pursuant to subsection 11, which must include,
but are not limited to, program goals supporting an overall reduction by producers
in the amount of packaging material used, an increased reuse by producers of
packaging material and an increased amount of post-consumer recycled content in
packaging material used by producers; recycling access and collection rate goals
for municipalities; overall program and material-specific recycling rate goals;
packaging material litter reduction goals; and any other goals required by the
department.

To the maximum extent practicable, material-specific recycling rate goals adopted
pursuant to this subparagraph must reflect the following recycling standards:

(a) Sorted glass is considered recycled if it does not require further processing
before entering a glass furnace or before use in the production of filtration
media, abrasive materials, glass fiber insulation or construction materials;
(b) Sorted metal is considered recycled if it does not require further processing
before entering a smelter or furnace;
(c) Sorted paper is considered recycled if it does not require further processing
before entering a pulping operation; and
(d) Plastic separated by polymer is considered recycled if it does not require
further processing before entering a pelletization, extrusion or molding
operation or, in the case of plastic flakes, does not require further processing
before use in a final product.

B. At the time that the stewardship organization submits its annual report to the
department pursuant to subsection 5, the stewardship organization shall pay to the
department a reasonable annual fee established by the department, not to exceed
$300,000, to cover the department's actual costs for review of the stewardship
organization's annual report and the department's costs in the prior fiscal year for its
oversight, administration and enforcement of the packaging stewardship program. In
accordance with subsection 12, paragraph C, the annual fee required under this
paragraph may include reimbursement of any costs incurred by the department in
adopting rules and in administering and enforcing this section prior to the effective date
of the contract entered into by the department and the stewardship organization pursuant to subsection 3.

C. A producer or group of producers, when submitting a proposal to the department for the establishment of an alternative collection program or submitting a proposal to the department for modifications to an approved alternative collection program under subsection 8, shall pay to the department a reasonable fee established by the department to cover the department's actual costs for review of the proposal or proposed modifications. A producer or group of producers operating an approved alternative collection program under subsection 8 shall pay to the department a reasonable annual fee established by the department, not to exceed $10,000 per participating producer, to cover the department's actual costs for review of the producer's or group's annual report and the department's costs for the oversight, administration and enforcement of the alternative collection program, which may be waived by the department if those activities by the department do not require significant department staff time.

D. Beginning February 15, 2023, and annually thereafter, the department shall submit a report to the joint committee of the Legislature having jurisdiction over environment and natural resources matters regarding the packaging stewardship program and alternative collection programs implemented pursuant to this section.

(1) The report must include, at a minimum, data on the amount and type of packaging material associated with products sold, offered for sale or distributed for sale in or into the State; data regarding how that packaging material was managed; and any recommendations for amendments to the programs implemented under this section, including, but not limited to, the establishment of new program goals or the imposition of a prohibition on the sale, offer for sale or distribution for sale in or into the State of products associated with packaging material that the department has determined is nonessential, is contaminating collected recyclable material, is a common source of litter or exhibits toxicity, particularly if that toxicity is demonstrated to have a disproportionate impact on any community in the State.

(2) Beginning February 15, 2027, and every 5 years thereafter, the report under this paragraph must describe the results of a comprehensive review of the rules adopted by the department pursuant to this section and shall include recommendations by the department for any legislative changes to this section determined necessary as a result of that review, including, but not limited to, changes to the flat fee that may be paid by a low-volume producer pursuant to subsection 6, paragraph C, as well as a description of any changes to those rules that the department intends to propose in a future rulemaking.

(3) The report required under this paragraph may be included in the report required pursuant to section 1772, subsection 1.

14. Antitrust exclusions. A producer or stewardship organization, including a producer's or stewardship organization's officers, members, employees and agents that organize a packaging stewardship program or an alternative collection program under this section, is immune from liability for the producer's or stewardship organization's conduct under state laws relating to antitrust, restraint of trade, unfair trade practices and other regulation of trade or commerce only to the extent necessary to plan and implement the
producer's or stewardship organization's packaging stewardship program or alternative

46 collection program consistent with the provisions of this section.

15. Proprietary information. Proprietary information submitted to the department
47 pursuant to the requirements of this section or the rules adopted pursuant to this section
48 that is identified by the submittor as proprietary information is confidential and must be
49 handled by the department in the same manner as confidential information is handled under
50 section 1310-B.

Sec. 2. Department of Environmental Protection; stewardship program
51 for packaging; routine technical rulemaking. On or before May 1, 2022, the
52 Department of Environmental Protection shall initiate routine technical rulemaking
53 consistent with the Maine Revised Statutes, Title 5, chapter 375, subchapter 2-A to adopt
54 rules necessary for the implementation, administration and enforcement of a stewardship
55 program for packaging pursuant to Title 38, section 2146. The rulemaking required by this
56 section must be done within existing resources and, notwithstanding any provision of law
to the contrary, the department may use funds within the Maine Solid Waste Management
57 Fund established pursuant to Title 38, section 2201 to support its activities required by this
58 section except that, if the department uses funds within the Maine Solid Waste Management
59 Fund as authorized under this section, the department shall deposit back into that fund the
60 same amount of funds withdrawn once reimbursed pursuant to Title 38, section 2146,
61 subsection 13, paragraph B.

SUMMARY

This bill establishes a stewardship program in the State for packaging material, to be
62 operated by a stewardship organization contracted by the Department of Environmental
63 Protection following a competitive bidding process. Under the program, producers of
64 products contained, protected, delivered, presented or distributed in or using packaging
65 material pay into a fund based on the amount by weight of packaging material associated
66 with the products they sell, offer for sale or distribute for sale in or into the State. Producers
67 can wholly or partially offset this payment obligation by implementing independent
68 programs to recycle packaging of the same material type for which they have a payment
69 obligation and can further reduce their payment obligation by reducing the amount of
70 packaging associated with the products they sell, offer for sale or distribute for sale in or
71 into the State or by meeting other program incentives.

Producer payments received by the stewardship organization are used to reimburse
72 eligible municipalities for certain recycling and waste management costs. To be eligible
73 for such reimbursements, a municipality must share with the stewardship organization
74 certain data regarding its recycling and waste management costs and must provide for the
75 collection and recycling of packaging material generated in the municipality that is
determined to be readily recyclable. In addition to the payment of municipal
76 reimbursements, the stewardship organization is authorized to use producer payments to
77 cover the operational costs for the program, to pay department fees and to make
78 investments in education and infrastructure aimed at reducing packaging waste and
79 improving recycling outcomes in the State.
